# Olivia Elliott

Full Stack Developer

## SUMMARY

Dedicated full stack web developer with over two years of experience, pursuing freelance opportunities within challenging and collaborative environments. Proficient at harmonizing creativity with problem-solving to engineer responsive and user-friendly applications. Demonstrates a proactive and hardworking approach, emphasizing ongoing operational enhancement. A highly motivated team player and rapid learner, known for strong communication skills, meticulous attention to detail, and adaptability. Proficiency in Agile methodologies, contributing curiosity and unwavering commitment to projects with a vested interest in their success.

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

Feb '23 - Present

#### Aktiga

Asheville, NC

- Spearheaded development efforts as the lead developer at a dynamic tech startup, specializing in the creation of responsive spatial web applications.
- Demonstrated versatility by seamlessly navigating both front-end and back-end technologies, customizing solutions according to the unique requirements of each project.
- Pioneered the development of cutting-edge immersive VR applications, harnessing the power of technologies like ThreeJS and React-Three-Fiber to craft engaging, 3D web experiences.
- Played an integral role within the team, contributing from the inception of project ideas to the meticulous execution of the final product, emphasizing a hands-on approach to project development and delivery.

### Operations Manager

Feb '21 - Feb '23

#### The Care Collective

Boone, NC

- Forward-thinking team leader with a track record of efficiently managing departments to achieve sales goals, contributing to a remarkable \$928,545 in revenue generation in 2022.
- Joined the company during a period of unprecedented growth, with an initial gross revenue of approximately \$400,000 in 2021.
- Played a pivotal role in training and managing a team of nine members, ensuring the optimal alignment of employees with their roles to maximize performance.
- Adapted and expanded responsibilities as the business scaled, experiencing a growth of over 400% in both employee count and service offerings.
- Recognized for playing an integral role in visionary business operations and efficiently executing day-to-day tasks, helping turn plans into reality.
- Oversaw client retention, leading marketing and communications efforts to ensure strong client relationships.
- Proactively followed up with dissatisfied customers to address their concerns and guarantee their future needs were met.
- Provided extensive training to the team, equipping them with the skills to handle dissatisfied customers and make them feel valued and heard.

## EDUCATION

### Full Stack Certificate

Oct '22

#### UNC Chapel Hill Coding Full Stack Bootcamp

Remote

Completed a 6 month intensive program focused on gaining technical expertise to develop interactive web applications that utilize UI, front-end, and back-end technologies. Contains 450+ hours of live instructional time, asynchronous material, group projects, and individual assignments.

### Bachelors of Science

Jun '19

#### Appalachian State University

Boone, NC

Cultural Anthropology | Spanish | Sustainable Development

Senior Honors Award for Applied Anthropology

## TECHNICAL PROJECTS

emVR | Front & Back End Collaborator

### www.emvr.org

- Led the development of emVR, a groundbreaking online platform designed to enable therapists to deliver Eye Movement Desensitization and Reprocessing (EMDR) therapy to clients through immersive virtual reality experiences.
- Engineered robust communication systems within emVR to seamlessly transmit therapist settings and parameters to clients, ensuring a tailored and effective therapy experience.
- Crafted a fully immersive virtual environment that harnesses the power of visual, audio, and haptic stimulation, offering clients a highly engaging and therapeutic VR experience.
- **Languages:** NextJS, React, React-Three-Fiber, TailwindCSS

### Company Website | Front & Back End Collaborator

### www.aktiga.com

- Spearheaded a multifaceted initiative to enhance the company website, taking a hands-on approach in both front-end 2D and 3D design. This encompassed creating visually engaging and interactive elements to enrich the user experience.
- Pioneered the development of a robust framework and environment within the website, seamlessly integrating 2D and 3D components into a single-page application. This integration not only modernized the website's aesthetics but also contributed to its overall functionality and interactivity.
- Played a pivotal role in the organization and implementation of an open-source component library. This library serves as a valuable resource for the company, streamlining future development efforts and ensuring consistency across web assets.
- **Languages:** NextJS, ReactJS, React-Three-Fiber, TailwindCSS
